

Research Group on Energy & Clean Technologies

Luca Cedola

Past RTD-A under evaluation as ASN - PA

Alessandro Tallini

Research Assistant

Energy & Clean Technologies – *Energy efficiency*

Submitted Proposal

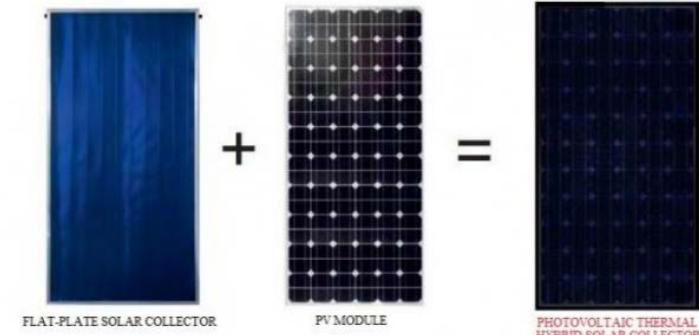

Industrial partnership

Smart Grid
Energy storage + RES

**POLY-EN SYS Innovative and efficient
systems for energy poligeneration**
H2020 (2017)

*ELFRAN-HYBRID solution (hybrid
solar thermal collector)*

*PV-T module construction
(hybrid solar thermal collector)*

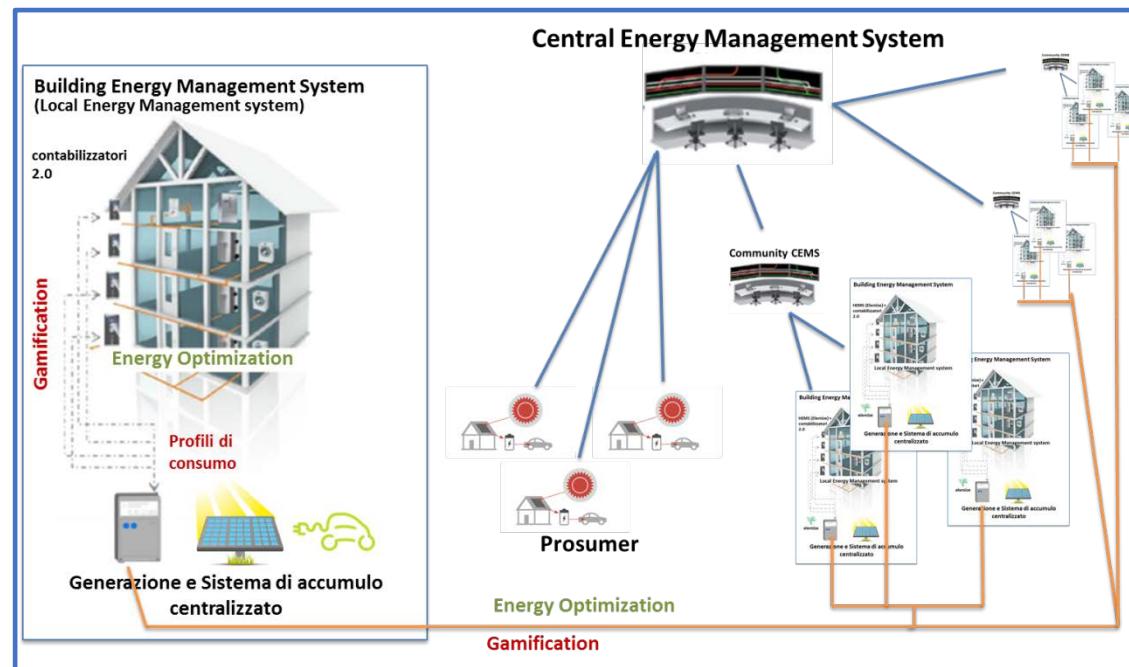

SSD: ING-IND/09 Sistemi per l'Energia e l'Ambiente

Energy & Clean Technologies – *Energy efficiency*

Submitted Proposal

Industrial partnership

Smart Grid

SSD: ING-IND/09 Sistemi per l'Energia e l'Ambiente

Energy & Clean Technologies – *Energy efficiency*

Submitted Proposal

Industrial partnership

Smart Grid

**“NewCo in L’Aquila” Contratto di Sviluppo
in tema Energia e Ambiente**

Totale del Contratto di Sviluppo: 26M€

**NewCo in L’Aquila
Contratto di Sviluppo
in tema Energia e Ambiente**

Energy & Clean Technologies – *Energy efficiency*

Submitted Proposal

Industrial partnership

Smart Port

Shore Side Electricity and Energy Efficiency Measures in Mediterranean Ports

CEF - Connecting Europe Facility 2014-2020

SSE

Provision of shore side electrical power to a ship at berth while its engines are shut down

Set of equipment and system that can contribute for the environmental sustainability of the port

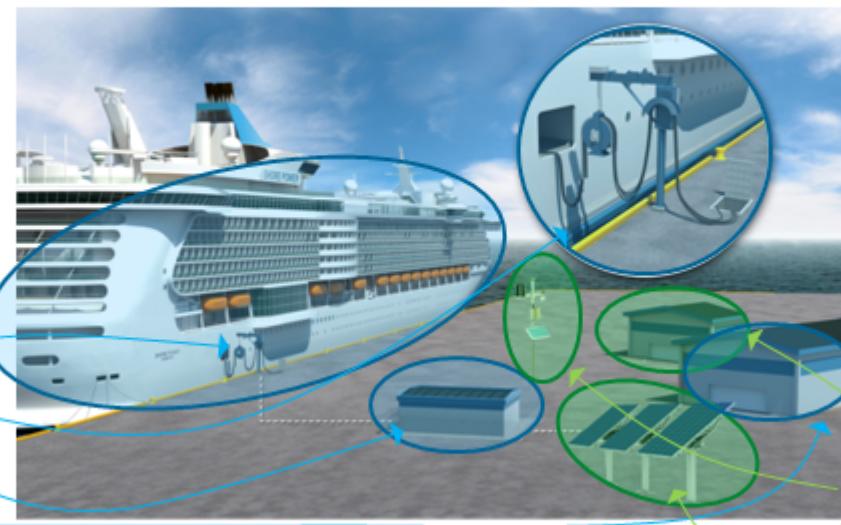

EEM

Goals

- Noise reduction in the port areas
- Air pollution reduction into the areas neighboring at port(city)
- Global reduction of the greenhouse emission

+ Enabling factors

- On board connection system
- On shore connection system with voltage and frequency conversion
- Storage system
- Grid expansion
- Electrical loads monitoring system

Goals

- Increase of renewable resources exploitation
- Environmental performance monitoring
- Port's higher energy independence (greater safety, lower costs)
- Port's higher energy efficiency.

+ Enabling factors

- Energy Management System
- Energy storage system (battery)
- Environmental monitoring system
- E-Mobility
- Generation plants with renewable sources (Photovoltaic panels)
